Inserting the batteries

Remove battery cover

Insert two AAA batteries

Replace the battery cover

Programmable Remote Control Unit

TH100 package includes a remote control with a group of five programmable buttons, marked with blue color which may be used to control other devices.

To program the buttons:
Press and hold the blue "On/Off" and the "A/V" buttons at the same time until you notice the red light of he blue "On/Off" button becomes brighter. This means the remote is ready to learn.

1. Choose the button you want to "teach" a new code to - the red light of the "On/Off" button will start to blink.
2. Place the infrared outputs of the two remotes against each other and press the button on the remote control of the other device that you wish to copy and hold for 2 seconds.
3. You sill see the blue "On/Off button blink a couple of times quickly, this means the button has been programmed.
4. Repeat steps 1 to 3 to choose and program the other buttons of the remote control
5. Press and hold the blue "On/Off" and the "A/V" buttons at the same time until you notice the red light of he blue "On/Off" button turns off to save the programmed data.
